The peak brightness reaches around 500 nits, adequate for outdoor visibility under bright sunlight. Color accuracy is satisfactory for most users, though professional-grade content creators might find it lacking in color calibration precision.

Limitations and Observations

While the IPS LCD provides decent viewing angles and responsiveness, it does not match the contrast and black levels of AMOLED counterparts. The 90Hz refresh rate, although an upgrade over traditional 60Hz screens, is not as high as flagship devices that feature 120Hz or higher, which could be a point of contention for tech enthusiasts.
